**New!**

## 95730 YJ-LTE™ Refrigerant Recovery System

*The smallest, lightest,  
most powerful unit in its class.*

- Superior condenser design - keep unit cooler, longer
- Easy to use - single valve control
- Single gauge shows tank pressure
- Built in purge circuit and built in circuit breaker
- Lightweight at 24 pounds

\*Product will not be stocked at all branches.

**New!**

## 19047 Gasket Remover Tool w/ Replacement Gaskets

*Easily remove worn out gaskets from  
hoses with this handy tool!*

- A sharp and long pick to pull the gasket from deep inside the hose
- Additional feature on the back of the tool is used to place the depressor inside the hose
- Extra gaskets stored inside the tool for convenience

## 69048 eVac II Programmable Digital Vacuum Gauge

*Accurately measure vacuum pressure  
with resolution down to 0.1 micron!*

### Excellent Combination of:

- Speed
- Accuracy
- Oil Contamination Resistance
- Self Calibration
- Programmable Target Pressure and Vacuum Timer

### Features:

- 0 to 25,000 micron range with 0.1 micron resolution less than 10,000 microns
- Measures vacuum in microns, pascals, millibar, millitorr and mmHg
- "Analog" vacuum level bar graph
- Automatic warning when oil enters the sensor
