

Refrigerant Recovery, A2L & System Evacuation Training

Presented by: Jeff Hutton

2 CEU's / 2 Credits Towards Kentucky and Ohio Journeyman's License

Thursday, March 26, 2026

3pm - 5:30pm

\$50 per attendee

Duncan Supply - Indianapolis

101 W. 9th Street

Indianapolis, IN 46204

LEARNING OBJECTIVES

- Why and how to remove flow restrictions during recovery & evacuation
- Hose diameter and how it effects the recovery and evacuation process
- Liquid vs. vapor recovery
- Recovery tank position options
- Bench testing Appion recovery machines
- How a vacuum pump works
- Vacuum gauge selection
- Vacuum gauge connection location
- Testing vacuum pumps
- Vacuum pump oil selection and proper procedures for changing
- Proper use of charging manifolds as it relates to the recovery, evacuation and charging process
- The effects of poor vacuum practices pertaining to the refrigerant being used and its correlation to leak sealants and system inefficiency
- Why recovery machines and vacuum pumps deteriorate over time and how to prevent it
